

What's Left on the Second Floor?

The following table is a list of everything that needs to be done by room before Tyler and I can finally call the second floor complete! The SW bedroom isn't included in the list because we can't finish it till we start working on the first floor. And, the master bathroom is excluded because we're still searching for our "inspiration" on what to do with it. So, we're holding off till we get an idea of how we want the master bathroom to look.
